Pre-Proposals for Sponsored Projects

Policy Owner: Office of the Vice Provost for Research
Effective Date: October 24, 2016
Last Updated: June 23, 2017

Policy Contact: Associate Vice Provost for Research Administration & Development

REASON FOR POLICY

In some instances, sponsors ask for a pre-proposal to triage potential applicants for a sponsored project. This procedure establishes the guidelines for submission of pre-proposals in order to authorize commitments on behalf of the University, ensures that Tufts does not submit more than the allowed number of pre-proposals for limited submission funding opportunities, and enhances data collection on research productivity.

POLICY PRINCIPLES

A pre-proposal establishes communication between the sponsor and the applicant to determine whether a full proposal should be submitted and, in some instances, to obtain advice that will improve the proposal’s chance of success. Pre-proposals can take many forms, including a shortened version of the proposal, a letter of intent (LOI), or a white paper, the specifics of which are either outlined in the funding opportunity announcement or otherwise communicated by the sponsor. Occasionally a pre-proposal may result in an award without the need to subsequently submit a full proposal. Other times, an invitation to submit a full proposal follows a pre-proposal.

The pre-proposal must be routed for internal approval before being submitted to a sponsor if any of the below circumstances apply:

- **Limited submission**: the number of pre-proposals and/or full-proposals either from Tufts University or from a School / Center is limited (see Limited Submission competition process for more information);
- An **authorized signatory** is required or the pre-proposal is submitted through an electronic system that requires submission by an OVPR Pre-Award Signing Official (e.g. Fastlane, Grants.gov, etc.);
- The pre-proposal commits the University to **cost sharing** of any kind; and/or
- The sponsor requests project **budget information** of any kind as part of the pre-proposal except when the pre-proposal includes only a total proposed amount that matches the maximum award amount cited in the call for proposals.

Pre-proposals requiring internal approval are routed for internal approval in the Proposal Development module of the Research Administration System (RAS). Those departments and schools that have not transitioned to RAS should continue to use the Internal Sponsored Coordination Form (ISCF) to facilitate the routing process. OVPR requires the signature of the Dean or Designate of the respective School only for pre-proposals when the following are present: cost share, reduced indirect cost rate, course release, space renovations, major operating expenses, and/or capital equipment purchases. However, Schools / Centers may have additional approval requirements. If applicable, a PI eligibility waiver must be requested as part of the pre-proposal.
approval process (see PI Eligibility for Sponsored Projects). The 5-day rule for institutional review process applies to pre-proposals that require internal approvals.

If the sponsor approves the pre-proposal for submission of the full application, internal approvals must be completed in accordance with the internal approval process. For those Schools currently using RAS, the full application should be prepared and routed for internal approval in the Proposal Development module.

---

**DEFINITIONS**

**OVPR Pre-Award Signing Official:** staff member of the Pre-Award Office of Research Administration that is authorized to sign proposals for sponsored projects.

**Pre-proposal:** preliminary proposal submitted to the sponsor in advance of the full application for funding.

**Research Administration System (RAS):** Tufts electronic tool for preparing and routing proposals for sponsored programs.
