

**Postdoctoral Scholar:** Postdoctoral positions are available immediately in the Department of Molecular Biology and Microbiology at Sackler School of Tufts University School of Medicine to join a group working on gram-negative bacterial pathogens and infectious diseases.

Qualified individuals will have a Ph.D. and experience in Microbiology/Immunology/Cell biology or Protein Biochemistry and at least one first authored paper in a peer-review journal. Applicants with research experience in protein purification, protein biochemistry, bacterial genetics, and/or design and execution of chemical or genetic screens are particularly encouraged to apply. One project focuses on developing and performing a high-throughput screen. This project offers opportunities for career development in translational research and close collaboration with industry. A second project involves investigating the regulation of a pathogenic process using microbial genetics and cell culture.

To apply, candidates should submit CVs and names of three references including Ph.D. mentor and current employer to Dr. Joan Meccas by email: [joan.meccas@tufts.edu](mailto:joan.meccas@tufts.edu). Tufts University is an Affirmative Action /Equal Opportunity (AA/EO) employer and actively seeks candidates from diverse backgrounds. Please see the Tufts University non-discrimination statement.
