Do you love science? Do you enjoy sharing how cool it is? We need you!

Science from Scientists' mission is to significantly impact the way science education is presented to students and educators, thereby improving student competency and interest so that our nation remains competitive on a global scale.

We’re looking for charismatic scientists to teach hands-on science and engineering lessons to elementary and middle school students. Scientists would work alongside classroom teachers during the school day to improve students’ attitudes and aptitudes in science and engineering.

• **Where:** Greater Boston and Greater San Francisco Bay areas
• **What:** This is for an hourly position (starting at $20/hour) with the potential to become a part-time or full-time job after one semester.
• **Requirements:** Must have an undergraduate degree in a STEM (science, technology, engineering, or math) field and a Master’s or PhD in a STEM field, or be working towards that graduate degree.
• Some day-of-week flexibility available. Drivers license and access to a car not required, but recommended for optimal school placement.

Help our youth love STEM. Apply online at sciencefromscientists.org/work
