

Future of Data Studies at Tufts University

Office of the Vice Provost for Research

Presents

John Quackenbush, PhD

Director of the Center for Cancer Computational Biology, Dana-Farber Cancer Institute & Professor of Bioinformatics, Harvard T.H. Chan School of Public Health

Dr. John Quackenbush is the Director of the Center for Cancer Computational Biology, Department of Cancer Biology at the Dana-Farber Cancer Institute and Professor of Computational Biology and Bioinformatics at the Harvard T.H. Chan School of Public Health. Dr. Quackenbush received his PhD from University of California, Los Angeles.

Dr. Quackenbush's current research focuses on the analysis of human cancer using systems biology-based approaches to understanding and modeling the biological networks that underlie disease. This has led him and his colleagues to make fundamental discoveries about the role that variation in gene expression plays in defining biological phenotypes. Dr. Quackenbush was an instrumental part of the human genome project and currently serves on the editorial boards of five major journals and is editor-in-chief at *Genomics*. He has served on several committees at the National Academies and the Institute of Medicine.
